Joe,
Coursicle
joe@coursicle.com

Dear Joe,

I was thrilled to come across the opportunity at Coursicle, a platform that not only champions mental health and gender equality but also actively works towards creating a more inclusive and supportive academic environment. As a Computer Science and Physics student deeply invested in using technology to foster community and support mental well-being, I am excited about the prospect of contributing to Coursicle Chat, a feature poised to make a significant impact on student life.

Throughout my academic and project work, including my experience developing web applications and working on collaborative projects, I have seen firsthand the power of technology to bring people together and address critical social issues. My internship at Leapfrog Technology Inc. taught me the importance of user-centered design and the impact it can have on engagement and community building. I believe these experiences align well with the goals of Coursicle Chat to reduce isolation and foster a sense of community among students.

The mission-driven approach of Coursicle, focusing on mental health, gender equity, and reducing wealth disparity, deeply resonates with me. I am particularly moved by Coursicle's commitment to creating a safe and inclusive platform, as indicated by the requirement of a .edu email to reduce hate and harassment. This thoughtful approach to platform design is something I am eager to support and contribute to.

While I have a solid foundation in various programming languages and web development technologies, I am excited about the opportunity to learn and grow within Coursicle's unique tech stack. Your philosophy of hiring great people and teaching them what they need to know is incredibly appealing, as I believe that a commitment to continuous learning is vital in the rapidly evolving field of technology.

Furthermore, the small team size at Coursicle presents a unique opportunity to contribute to various aspects of the business. I am eager to not only enhance my development skills but also gain insight into the software, business, and marketing facets of Coursicle. This holistic understanding of the business is something I look forward to contributing to and learning from.

I am inspired by Coursicle's mission and would be honored to contribute to a platform that has such a positive impact on students' lives. I am available for an interview at your convenience

and can be reached at (615) 525-6789 or rojin.sharma@vanderbilt.edu. Thank you for considering my application. I look forward to the possibility of contributing to Coursicle's mission and being part of a team that values inclusivity, support, and community.

Warm regards,
Rojin Sharma
